

LinkedIn Summary

I am a professional IT Support candidate with a strong foundation in computer systems, networking, troubleshooting, and IT service delivery. Through the Ubuntu Innovations Capstone Project, I have gained practical experience in supporting end-users, diagnosing technical issues, and maintaining efficient and reliable IT environments.

My technical skills include hardware and software support, basic networking, system configuration, and security awareness. I am confident in troubleshooting a wide range of IT issues, including device failures, connectivity problems, and software-related errors.

In addition to my technical capabilities, I have developed strong customer support skills, including clear communication, problem-solving, patience, and the ability to assist users in a professional and efficient manner. I understand the importance of delivering timely and user-focused IT support in fast-paced environments.

I am focused on entry-level IT Support opportunities where I can apply my technical knowledge while continuing to develop my skills in real-world environments. I am committed to maintaining secure systems, improving user experience, and contributing positively to IT operations.
